

N/A presents:

Sailplane Operations & Glider Pilot Certification

Flight instructor Chuck Gifford will present an overview of basic glider and sailplane operations. This presentation is suitable for both non-pilots as well as licensed pilots who would like to add a glider rating to their current private or commercial certificates. Chuck will describe glider operations, typical sailplane and glider performance characteristics, sailplane techniques, and certification and testing requirements for private and commercial licenses or ratings. Our program will begin promptly at 7 PM. Invite a friend and/or bring a potential member with you. SoCal Pilot members please check your status at www.ocpilots.org and make sure that your membership is current and that your FAA registered email address is on your SoCal Pilots profile and finally, be sure to bring and wear your badge as it helps speed up check-in and helps you put "names" to those faces you remember but.... By simply checking in at the registration table current SoCal Pilots members will automatically receive WINGS credit without FAA registration. We request that non members pre-register for this event at www.faasafety.gov. Our standing pre-meeting dinner will be at 5:15 at Flo's restaurant. These well attended dinners offer an excellent opportunity for us to catch up with our friends and get to know other area flyers
